Note:

Product pricing & availability may be subject to change by the manufacturer or distributor without notice.

Dark Sky Lighting Catalogue Contents

The purpose of this catalogue is to identify a large range of "dark sky friendly" fixtures which are carried by local retailers, and share them with residents and builders who wish to preserve our dark skies and prevent further light pollution on the Peninsula.

We hope that by making this lighting catalogue widely available, the environment, consumers, and local retailers, will benefit. - prepared by Rod Steinacher (Dark Sky Committee)

Using the Catalogue:

[Light fixture manufacturers & local lighting retailers](#) are listed on **page 8** of this catalogue.

You can check which **local retailers** (Bruce Peninsula & Owen Sound) carry 'dark sky friendly' lighting, and obtain their contact information. (Note: not every retailer in the district has been included.)

Light fixture manufacturers are listed alphabetically (CANARM, Galaxy, Hampton Bay, etc.) and the page the main section of the catalogue is given.

[Timers & motion detectors](#) are found on **page 43**.

[Retrofitting shields](#) are found on **page 47**.

Please note:

1. **New models of light fixtures are continually becoming available, at a number of different price points. This catalogue will not be able to keep up with all of these changes, so please check with local retailers for updates.**
2. **Because several of the lighting manufacturers are from outside Canada, pricing may vary due to currency fluctuations and manufacturing costs.**
3. **Manufacturers and retailers, of course, maintain the right to change models and pricing without prior notice.**

Thanks to local lighting retailers for their assistance in compiling the pricing for this catalogue.

Should Your Lighting be Converted to Dark Sky Friendly?

- based on the four basic concepts guiding effective dark sky lighting practices

* If you answer 'yes' to any of the following 12 questions, you should consider converting some, or all, of your outdoor lighting to be more dark sky friendly.

| | YES | NO |
|---|--------------------------|--------------------------|
| 1. Illuminate only the <u>minimum area</u>. | | |
| • Are you lighting outside areas that do not need to be lit ? | <input type="checkbox"/> | <input type="checkbox"/> |
| • Is any light from inside the building 'spilling' outside? | <input type="checkbox"/> | <input type="checkbox"/> |
| • Is any light from outside fixtures being directed upwards ? | <input type="checkbox"/> | <input type="checkbox"/> |
| • Is any light from outside fixtures being directed sideways into your eyes as 'glare'? | <input type="checkbox"/> | <input type="checkbox"/> |
| • Is any light trespassing onto adjacent properties or into the windows of adjacent buildings? | <input type="checkbox"/> | <input type="checkbox"/> |
| 2. Illuminate only to the <u>minimum intensity</u>. | | |
| • Does existing light feel harsh or make you squint? | <input type="checkbox"/> | <input type="checkbox"/> |
| • Would you still feel safe and secure if less light was used? | <input type="checkbox"/> | <input type="checkbox"/> |
| 3. Illuminate only for the <u>minimum duration</u>. | | |
| • Is lighting on indoors when no one is using it? | <input type="checkbox"/> | <input type="checkbox"/> |
| • Do you leave your outdoor lighting on at all times? | <input type="checkbox"/> | <input type="checkbox"/> |
| • Is security lighting on at all times (rather than being available 'on demand')? | <input type="checkbox"/> | <input type="checkbox"/> |
| 4. Illuminate using the <u>minimum amount of blue/white light</u>. | | |
| • Does the lighting appear bluish or white? | <input type="checkbox"/> | <input type="checkbox"/> |
| • Are long-term savings on your lighting bills important? | <input type="checkbox"/> | <input type="checkbox"/> |

Making the Outdoor Lighting at Your Home Dark Sky Friendly

1. minimize the amount of illumination

- reduce number of lighting fixtures (to minimum level required)
- reduce lamp wattage (often by as much as 1/2)

2. minimize the area of illumination

(shine light only where it's needed)

- aim fixture downward so no light is directed up or to the sides (to prevent 'glare')
- reduce the number of fixtures (to minimum level required)
- ensure that little or no unwanted light falls directly onto adjacent properties
- ensure that little/no light falls directly onto the lake (to minimize impact on marine environment)

3. minimize the duration of illumination

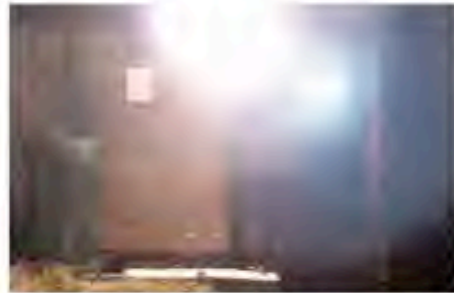

- timing (have lights out as long as practical)
- reduce number of fixtures (remaining lit during required period)

4. minimize the amount of "cold" wavelength illumination

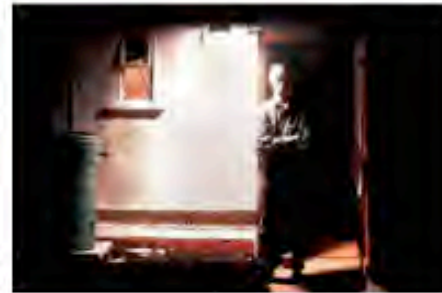

(favour the "warm" (yellow, orange, or red) end of the light spectrum to reduce impact on the natural environment)

- use bulbs (incandescent, compact fluorescent, or 'new generation' LED) with a 'warm' colour for regular outdoor household fixtures
- complete switch to HPS (high pressure sodium) bulbs for large fixtures (farm yard lights, parking lot illumination)

Effective Night Lighting

"Glaring" light from **unshielded** fixtures actually reduces your ability to see.

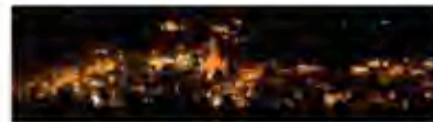

"**Full cut off**" (FCO) fixtures direct light down only, necessary for good nighttime vision.

Non-compliant fixtures
Poor design

Compliant fixtures
Good design

Town of La Pairie, Quebec in **2006, before** it was converted to dark sky lighting.

Town of La Pairie, Quebec in **2008, after** its dark lighting was in place.

La Pairie is one of 34 municipalities (including the city of Sherbrooke) in the Eastern Townships of Quebec, which are currently involved in a light abatement program and which also have exterior lighting regulations in effect. The nearby Mt. Megantic ASTROlab has, with financial assistance from municipal, provincial & federal governments and from businesses, undertaken this ambitious dark sky lighting project. It has resulted in an approximately 25% reduction in light pollution!

The area is the first to be designated an '**International Dark Sky Reserve**'.

Comparison of Incandescent, Outdoor Compact Fluorescent & LED Lighting

| Incandescent Light Bulbs | Outdoor Compact Fluorescent Light Bulbs | LED (Light Emmitting Diodes) Light Bulbs (2,600K to 3,700K wavelength) |
|--------------------------|---|---|
|--------------------------|---|---|

| Light Output | | | |
|--------------|-----------|----------------|--------------|
| | 40 Watts | 8.3 - 13 Watts | 4 - 5 Watts |
| | 60 | 13 - 15 | 6 - 8 |
| | 75 | 18 - 25 | 9 - 13 |
| | 100 | 23 - 30 | 16 - 20 |
| | 150 | 30 - 52 | 25 - 28 |

| Environmental Impact | | | |
|--|-----------------------|-----------------------|-----------------------|
| CO₂ emissions (/60W bulb/year) | 68 kg/yr (150 lbs/yr) | ~16 kg/yr (35 lbs/yr) | 6.8 kg/yr (15 lbs/yr) |
| ~ Operating costs (/60W bulb/year) | \$10.95 | \$2.56 | \$1.09 |
| ~ Heat emmitted (/60W bulb) | 85 btu/h | 30 btu/h | 3.4 btu/h |
| Contains mercury | no | yes | no |

| Other Facts | | | |
|---------------------------------------|------------------------------------|----------------------------|--------------------|
| Low temperature sensitivity | some | yes (under -22°C) | none |
| Humidity sensitivity | some | yes | none |
| On/Off cycling & bulb life | some decrease | significant decrease | none |
| Instant on | yes | no | yes |
| Durability | glass & filament both break easily | glass breaks fairly easily | can handle jarring |
| Life span (average) | 1,200 hours | 8,000 hours | 50,000 hours |

Local Dark Sky Lighting Retailers - Spring 2011

Bruce Peninsula Biosphere Association

Outdoor fixtures can be confidently considered "dark sky friendly" if **no** light is directed upwards, and the bulb is not visible when the fixture is viewed from the side. Fixtures with heavily frosted glass are not dark friendly, despite the claims of some companies. "Best practices" for lighting include directing light downwards and only where it is needed, using the lowest amount of illumination (wattage), for the smallest area, for the least amount of time practical, while favouring warmer wavelengths of light emitted from the bulb. Future LED technology will also enhance appropriate dark sky lighting. To view a wide range of International Dark-Sky Association (IDA)-approved light fixtures, visit their "Manufacturers Directory" at <http://www.darksky.org/mc/page.do?sitePageId=56423>.

Outdoor Lights

OUTDOOR LIGHT FIXTURES - A lighting fixture designed for outdoor use and engineered to handle the elements.

An emerging trend in design is to transform the area around your home into outdoor living spaces. Kichler Outdoor Lighting fixtures are designed to bring professional interior design principles to the exterior of your home with the high quality fit and finish that you expect from Kichler. From the front of your home to the backyard deck and garden, our Outdoor Lighting fixtures come in a wide variety of sizes and styles, ensuring there is something for anyone's home, no matter the decor. From wall lanterns and hanging lanterns to post top lanterns, Kichler can enhance the beauty of the outside of your home.

Be sure to view our collection of outdoor lamps. The shades in this series of outdoor lamps are made of Sunbrella® fabric and offer materials resistant to stain, mildew, and fading, providing years of beauty to your outdoor living area.

Timers & Motion Dectectors

All of the listed items are available at [HOME DEPOT CANADA](http://www.homedepot.ca/), in Owen Sound. (<http://www.homedepot.ca/>)
 See page 6 (above) for location & contact information. (Similar units were not found at the other retailers listed.)

Motion detectors & timers can be found built into the mounts of some outdoor security lighting fixtures, or can be retrofitted into an existing outdoor fixture.

Motion detectors & timers can also be installed into the light switch receptacle (in place of a simple indoor on/off switch). They turn the light's/lights' circuit (which may also include motion detectors or motion detecting light fixtures) on and off.

| Manufacturer | Description | Product # | MSL Price | Photo | Availability (Spring 2011) |
|--------------|---|---|----------------------------|--|-------------------------------|
| Heath Zenith | PAR Light Motion Sensor Adapter Retrofit Unit ----- The SL-5212-WH motion sensor adaptor easily adds motion detection to existing outdoor fixtures with 110° motion detection up to 60 ft. Simply screw lamp module into existing light and mount sensor nearby. Uses 1 - 120W Max PAR38 flood bulb (Not Included). 110 Degree Motion Sensor Adapter. Up to 60 ft. Detection Range. | Model: SL-5212-WH Store SKU # 1000473338 | \$29.99 (in store only) |  | Home Depot |
| Heath Zenith | 150 Degree Motion Sensing Post Light Sensor ----- The SL-4100-BK post light motion sensor is designed to convert existing post light fixtures to motion sensing security lights. Detects motion in a 150 degree arc. Mounts easily to existing 3" lamp post. Features DualBrite 2-level lighting. Converts existing post light fixtures. Mounts easily to existing 3" lamp posts. Selectable light timer: 1, 5 or 20 minutes. Patented DualBrite Two-Level Lighting Technology. | Model: SL-4100-BK Store SKU #: 1000136998 | \$29.98 (in store only) |  | Home Depot |

| | | | | | |
|---------------------|---|--|------------------------------------|--|-------------------|
| <p>Heath Zenith</p> | <p>Motion Activated Light Switch ----- The Wireless Command Motion, SL-6051-WH Motion controlled lighting kit converts existing lights to motion activated lights. Just replace your existing switch and mount the wireless motion sensor where desired to detect motion. The wireless motion sensor can be mounted up to 100 ft away from wall switch receiver. The motion sensor features 180 degree motion detection angle up to 70 feet away with selectable sensitivity and light timer of 1 or 5 minutes. The sensor requires two AA batteries that typical last up to one year. When motion is detected, the light controlled by the wall switch will turn on and turn off after motion stops. The wall switch receiver features control of lights up to 300 watts incandescent light and dimming</p> | <p>Model: SL-6051-WH Store SKU #: 1000168600 ----- of five light levels on the switch. The Heath Zenith Wireless Command Motion controlled light kit carries a two year warranty. Includes outdoor motion sensor & wired wall switch. Motion sensor activates wall switch to turn on light when motion is detected. Controls up to 300 Watts of incandescent lighting. Retrofit Light Shields

Instead of replacing existing lighting, it is much more economical to equip it with a retrofit light shield.

Retrofit light shields are available online for some of the worst light polluting type fixtures; yard blaster, security lighting wall packs, and floodlights.

RAB Lighting Company

<http://www.rabweb.com/common/catalog/pages/WSHADE.pdf>

Shades™

Shades improve the look and light distribution of new, old and mismatched lighting fixtures.

Friendly Lighting
Curved and Rectangular Shades fit over Wallpacks, Floodlights and Vandalproof fixtures

- Shade fits existing RAB Yard Blaster and other manufacturer's Barn Lights
- Fully covers lamp to cut glare & direct light down
- Cover existing fixtures that are worn, unattractive or mismatched. Add vandalproof metal protection.
- Field adjustable light distribution
- Shades add vandalproof metal protection
- Full Cutoff top vents heat, not light
- Stainless steel hardware
- Easy mounting template

Easy Installation & Relamping

1. Attach hanger brackets to wall on each side of fixture. Template provided.
2. Slide shade onto hanger bracket and tighten bolts.

Stop Glare & Light Pollution

Retrofit old fixture to comply with new glare and light pollution laws

Fits Over Fixtures For a Great New Look!

Standard top allows some uplight

Cutoff Top for Fully Shielded Full Cutoff lighting
